

Newsletter #3

SecureCyber Cluster

SECURECYBER
C L U S T E R

Welcome to the 3rd issue!

The newsletter will be out monthly and will include all the news and updates regarding the projects' progress and the relevant activities performed by their consortia!

In this issue, read about our new joint workshop that was held on 6th March 2024 and other activities from the cluster projects!

Don't forget to reach out and join us in LinkedIn!

Joint Events

“Cyber Threat Intelligence: Empowering IoT Security Workshop”

Another joint workshop of the cluster was held on 6 March 2024 at 10 CET remotely and was a success with more than 70 participants!

This workshop focused on the efforts of multiple EU-funded projects that have developed a Cyber Threat Intelligence (CTI) component, with a specific emphasis on IoT systems. The goal of this workshop was to equip participants with the skills and knowledge to gather, produce, elaborate, and share critical information about cyber threats and attacks, especially in IoT environments. The workshop also uniquely focused on how CTI can be seamlessly incorporated into several vertical industries, addressing industry-specific challenges and needs.

.

The workshop consisted of expert-led presentations, interactive sessions, demos and industry-focused discussions from key experts from **ARCADIAN**, **CROSSCON**, **ELECTRON**, **ERATOSTHENES**, **IDUNN**, **IRIS**, **SECANT**, **SENTINEL**, **SPATIAL**, **TRUST aWARE** !

If you missed the workshop or want to watch it again, you can do it, [here](#)

News from the Projects

THOR is one of the different tools created under IDUNN project that address cybersecurity challenges.

Sentinel Plenary Meeting and Pilot Workshop

The 7th SENTINEL plenary meeting took place on the 26th and 27th of February in Athens, Greece hosted by our partner from ITML. The primary focus of this meeting was strategic planning for the project's conclusion and the finalization of trials with the Pilots. Key topics of discussion included the project's exploitation activities and the preparation of comprehensive reports on the Key Results and achieved KPIs.

On the second day of the meeting a noteworthy occurrence took place, included the organisation, by the SENTINEL team, of a workshop centered around small and medium-sized enterprises (SMEs). The workshop aimed to showcase the project's significant achievements, providing an in-depth and hands-on demonstration of the SENTINEL platform. It delved into the project's innovation capacities, covering crucial aspects such as GDPR compliance, personal data protection, and cybersecurity, focusing on small and medium European businesses. These discussions shed light on how these elements intersect with and impact the core business activities of SMEs.

One of the highlights of the workshop was an interactive quiz that engaged participants, garnering valuable feedback and insights. The collaborative spirit demonstrated during the event further solidified our commitment to enhancing digital security and fostering innovation within the SME community.

Ensure you seize the opportunity to strengthen your business. Reach out to [SENTINEL](#) now!

Arcadian-IoT and Sentinel Final Event

The SENTINEL Final Event is set to take place on the 9th of April, in the city of Stockholm. This significant gathering is being organized in collaboration with the ARCADIAN-IOT project, marking an alliance aimed at fostering a day filled with dynamic Demos and Presentations. The event will also feature engaging sessions of discussions and panels, facilitating an enriching exchange of ideas and knowledge.

To broaden the scope and impact, invitations have been extended to several other prominent European projects, encouraging their active participation in the event. These projects will have the opportunity to disseminate their results and innovations through a dedicated poster exhibition session, contributing to a comprehensive showcase of advancements in the cybersecurity domain.

The overarching goal of the SENTINEL Final Event is not only to showcase the project's developments but also to provide valuable insights for the broader Research Community. By sharing knowledge, fostering collaboration, and highlighting emerging trends, the event aspires to make a meaningful contribution towards enhancing the cybersecurity landscape within the European ecosystem.

The SENTINEL team will also provide insights into the accomplishments achieved by the project at its closure, presenting the tailor-made platform and highlighting significant aspects within the project scope.

IRIS Pilot Use Cases

The 1st wave of the IRIS Pilot Use Case took place in Barcelona, Spain on 7 March 2024 and it was a success!
